

SageWest Media Response To Claims Made at Select Committee on Tribal Relations.

The information recently presented by Chairman Lee Spoonhunter is false and without merit. SageWest Health Care follows all appropriate regulatory and compliance guidelines for patients seeking care at our facility. To deny care is a violation of federal and state law – as well as our mission of Making Communities Healthier. As it relates to the detection, testing, and treatment of COVID-19, we continue to follow guidelines and protocols as outlined by the Centers for Disease Control and Prevention (CDC) – just as we have since March.

We are extremely proud of the heroic effort of our staff, the Fremont County Sheriff's Office, and all other local agencies that continue to work tirelessly to serve our community during these unprecedented times.

We consider it a privilege to serve the healthcare needs of our community and remain steadfast in our commitment to deliver high quality, compassionate care each and every day.
